Please, no more casinos. I am opposed to casinos in general. They do nothing to better our society. Gambling addiction creates too many problems. We do not need to build more venues for peoples lives to be ruined, for businesses and families to be stolen from to feed the habit. Our communities don't need the problems of traffic and crime that go hand in hand with casinos. There are going to be so many venues between those already in existence and the new ones being built in neighboring states the income generated is going to be too diluted. Think Atlantic City. Who needs it? Not Connecticut.
